INDEX
VOLUME 44

AUTHORS

Backes, Charles E. (Apr, 13–14)
Baker, Gus (Mar, 11–12, May/June 12–14)
Bame, E. Allen (May/June, 4–5)
Barnes, James L. (Mar, 29–30)
Bensen, M. James (Jan, 4–5)
Bonfadini, John (Mar, 8–10)

DeVore, Paul E. (Sept/Oct, 8–10)
Dillon, Linda Schnulle (Nov, 24–25)
Ditton, Paul (Mar, 11–12)
Doty, Dale (Mar, 11–12)
Dugger, William E. (May/June, 4–5)
DuVall, J. Barry (Nov, 8–9)

Edgar, Robert W. (Sept/Oct, 4–7)
Erickson, Richard (May/June, 12–14)

Forbes, Roy H. (Apr, 4–6)

Gindele, John (Dec, 6–8)
Gindele, Joseph (Dec, 6–8)
Gittinger, Jack D. (Jan, 28–31)
Good, Mary (May/June, 12–14)
Greguric, John (Sept/Oct, 23–25)
Grey, Paul (Jan, 9–12)

Hacker, Michael (Jan, 9–12)
Haynie, W. J. III (May/June, 6–9)
Hogge, Larry (Mar, 11–12)
Hughes, Thomas A., Jr. (Sept/Oct, 2–3; Apr, 2–3)

Johnson, Charles David (May/June, 23–26)
Johnson, Scott D. (Nov, 26–27)
Jones, Ronald E. (Dec, 28–29)
Jump, Charles (Jan, 2–3)

LaConte, Ronald T. (Dec, 4–5)
Land, Ming H. (Nov, 2)
Lovell, Mary G. (Dec, 13–14)

Maley, Donald (Nov, 3–6)
McCrory, David L. (Feb, 2–3)
Meyers, Albert (Feb, 4–8)
Morris, Mark (Apr, 7–10)

Oaks, Merrill M. (Jan, 26–27)
O'Hara, John (Apr, 11–12)

Pauls, Wesley (Apr, 28–30)
Pinder, Charles A. (May/June, 4–5)
Pontius, David R. (Nov, 10–13)

Sanders, Mark (Sept/Oct, 12–14; Feb, 39–41)
Savage, Ernest (Apr, 7–10)
Schiek, David J. (May/June, 28–30)
Schoonmaker, William E. (Dec, 24–25)
Scott, Michael (Feb, 13–15; Mar, 25–28)
Shakelford, Ray (May/June, 28–30)
Sheets, Everett (Nov, 28–30)
Siegel, Herb (Sept/Oct, 23–25)
Sinn, John W. (May/June, 2–3)
Smalley, Lee (Dec, 2–3)
Smink, Jay (Jan, 6–8)
Stern, Sam (Mar, 2)
Summers, Keith (Nov, 26–27)

Taylor, Charles O. (Jan, 28–31)
Theobald, Marie (Apr, 11–12)

Wieking, Robert (Jan, 13–14)
Whelan, Duke (Mar, 11–12)
White, Michael R. (Dec, 9–12)
Woods, Andy (Mar, 11–12)

TITLES

Basic Questions: What Should We Teach? (May/June, 2–3)
The Basics: Is Your Laboratory a Battleground in the Fight Against Ignorance? (May/June, 6–9)
Cartesian Coordinates: Preparation for Computer-Aided Drafting (Apr, 28–30)
Classroom Teachers: At the Top of the Profession (Mar, 2)
Communications—Interactive Video Courseware for Graphic Communications Teachers and Students (Feb, 39–41)
Communication Skills for the Future (Dec, 4–5)
Communications—Teaching Communications Through a Videotape Projects (Dec, 28–29)
Communications Technology and the Industrial Arts/Technology Educator (Dec, 6–8)
Community Education and the Industrial Arts/Technology Education Teacher (Apr, 13–14)
A Comparison of Convention Service for Selected Education-Related Associations (Mar, 25–28)

Energy—Incorporating Energy Conservation Into the Industrial Arts/Technology Education Curriculum (Mar, 29–30)
Energy—Solar Decisions: A Microcomputer Program (Jan, 28–31)
Entering a New Ara of Technology for All American People (Nov, 2)
Enterprise Experience—Exploring Industry and Careers in the Laboratory (Sept/Oct, 23–25)

Graduate Education and the Doctor of Industrial Technology Degree (Dec, 9–12)
Graduate Teacher Education: Implementing Innovation (Mar, 11–12)
Graphic Communications Curricula in Industrial Arts (Sept/Oct, 12–13)

High Technology: Dream or Reality? (Nov, 8–9)
How AIASA Chapters Can Benefit Your Industrial Arts/Technology Education Program (May/June, 12–14)

Improving Classroom Instruction: A Model for Experimental Research (Dec, 24–25)
Improving the Profession's Public Image (April, 2–3)
Improving Student-Teacher Performance (Mar, 8–10)
Increasing Equipment Reliability (Jan, 13–14)
Instructional Resources for the Industrial Arts/Technology Educator (Dec, 13–14)
Integrating Glass Technology Into Secondary School Technology Education Programs (Jan, 9–12)

Japanese Productivity: What Can America Learn? (Nov, 24–25)

Materials Testing—Developing Material Testing Equipment for Specific Needs (May/June, 28–30)

The National Center for Research in Vocational Education and the Industrial Arts/Technology Educator (Jan, 6–8)

Organizing Two Schools Into One Manufacturing Enterprise (Apr, 11–12)

Planning for the Future (Sept/Oct, 2–3)
Practical Answers to Common Questions About Special-Needs Students (Feb, 10–11)
Productivity As the Content Base for Industrial Arts (Feb, 4–8)
Professional Development Needs As Perceived by Minnesota Industrial Arts/Technology Teachers (Nov, 26–27)

Questions for the Profession (Dec, 2–3)

A Review of the 1984–85 Membership Numbers and Dues for Selected Education-Related Associations (Feb, 13–15)
Robotics—Making an Easy, Inexpensive Robot in the Industrial Arts/Technology Lab (Nov, 28–30)
The Role of Industrial Arts/Technology Education for Student Development in Mathematics, Science, and Other School Subjects (Nov, 3–6)

Setting the Future Agenda (Sept/Oct, 4–7)
The Soaring Technology Revolution (Jan, 4–5)
Standards for Technology Education: A Foundation for Contemporary Programs (May/June, 4–5)

Technical Terminology: Practical Guidelines for Teachers (May/June, 23–26)
Technological Adaptability: Can We Achieve It? (Jan, 2–3)
Technology and Community Development (Sept/Oct. 8–10)
Technology Education: Where Does the Funding Come From? (Mar, 4–7)
Technology or Industry: Which Shall It Be? (Feb, 2–3)
Technology Systems Matrix: Practical Application for Curriculum Development (Apr, 7–10)
Thinking Skills: What Are They? Can They Be Taught? Why and How? (Apr, 4–6)
Touring a Factory of Today (Nov, 10–13)

Using State Conferences To Develop Student Leadership (Jan, 26–27)
